~~Product Owner | Resources & Tools | Agile Product Management~~

The Product Owner role in Agile is not well understood and it can be confusing to understand how it relates to a typical project management role in a traditional, plan-driven environment. In my opinion, the Agile Product Owner role is actually a hybrid of some elements of a Product Manager role and some elements of a Project Manager role.

The product owner is a role on a product development team responsible for managing the product backlog in order to achieve the desired outcome that a product development team seeks to accomplish. Key activities to accomplish this include: Ensure transparency into the upcoming work of the product development team.

~~What is a Product Owner? | Agile Alliance~~

In agile software development, product management is about guiding a product through multiple iterations. Since agile programs are more fluid than traditional approaches, agile product management is a more flexible approach. One of the core concepts in agile is that the scope of a project is fluid, while resources stay the same.
