23 December 1947 was a snowy early winter day at Bell Telephone Laboratories in Murray Hill, N.J. A group of senior Bell Labs scientists and administrators gathered in a laboratory where physicists John Bardeen and Walter Brattain were about to demonstrate the first solid state amplifier, the point-contact transistor. They switched their invention in and out of an audio circuit, so those ...

From the mid 1950s and through mid 1970s, Popular Electronics magazine ran a series of articles entitled "Solid State" in order to facilitate the electronics industry's effort to move people from vacuum tubes to semiconductors. In fact, if Solid State ran every months since its beginning, this being installment 182 means it began in 1956 - just eight years after the transistor was invented.
