The fun and easy way to repair anything and everything around the house For anyone who's ever been frustrated by repair shop rip-offs, this guide shows how to troubleshoot and fix a wide range of household appliances-lamps, vacuum cleaners, washers, dryers, dishwashers, garbage disposals, blenders, radios, televisions, and even computers. Packed with step-by-step illustrations and easy-to-follow instructions, it's a must-have money-saver for the half of all homeowners who undertake do-it-yourself projects.

The growth in the Bioinformatics and Computational Biology fields over the last few years has been remarkable and the trend is to increase its pace. In fact, the need for computational techniques that can efficiently handle the huge amounts of data produced by the new experimental techniques in Biology is still increasing driven by new advances in Next Generation Sequencing, several types of the so called omics data and image acquisition, just to name a few. The analysis of the datasets that produces and its integration call for new algorithms and approaches from fields such as Databases, Statistics, Data Mining, Machine Learning, Optimization, Computer Science and Artificial Intelligence. Within this scenario of increasing data availability, Systems Biology has also been emerging as an alternative to the reductionist view that dominated biological research in the last decades. Indeed, Biology is more and more a science of information requiring tools from the computational sciences. In the last few years, we have seen the surge of a new generation of interdisciplinary scientists that have a strong background in the biological and computational sciences. In this context, the interaction of researchers from different scientific fields is, more than ever, of foremost importance boosting the research efforts in the field and contributing to the education of a new generation of Bioinformatics scientists. PACBB'11 hopes to contribute to this effort promoting this fruitful interaction. PACBB'11 technical program included 50 papers from a submission pool of 78 papers spanning many different sub-fields in Bioinformatics and Computational Biology. Therefore, the conference will certainly have promoted the interaction of scientists from diverse research groups and with a distinct background (computer scientists, mathematicians, biologists). The scientific content will certainly be challenging and will promote the improvement of the work that is being developed by each of the participants.

Living with a tigress is no joke! This is the true story of a Forest Conservator who risked his life and went beyond the call of duty for Khairi, a tigress he considered as his very own. The book offers the perfect balance of a biography and a scientific study. Khairi is so brilliantly brought to life in this book that you almost expect to hear her padding up behind your chair, purring loudly.

This newly revised deluxe edition of MoMA Highlights celebrates the 90th anniversary of the Museum MoMA Highlights presents a chronological overview of some of the most significant modern and contemporary artworks through superb high-resolution images and short texts by MoMA curators. MoMA Highlights interweaves works from each of the Museum's curatorial departments - painting and sculpture, drawings, prints and illustrated books, photography, architecture and design, film, and media and performance art - to provide a look at one of the premiere art collections in the world. This anniversary book is almost 50% larger than the standard edition.

For anyone who wants to learn the fundamentals of branding in an approachable way without poring over dense text or hiring an expensive consultant, Star Brands presents a unique model that offers structured guidance and professional tips for building, managing, and marketing any brand. Created by savvy brand manager Carolina Rogoll, the star brand model is a perfect intersection of solid marketing and management theory with an approachable, visually oriented design. The author teaches step-by-step how to assess a brand's unique challenge, how to define the brand's equity and target, how to craft a solid brand growth strategy, and how to measure success once the brand is in the marketplace. The book includes case studies from famous star brands as well as interviews with top business school professors, advertising agency leaders, and former CEOs. Topics covered include the star brand model, leaders behind star brands; brand assessment and goal setting; defining brand equity; selecting a brand target; insights, benefits, ideas; theory from the best marketing and managing resources; marketing strategy; how to build a marketing plan; and much more, including exercise worksheets to practice on! The author combines her experience building brands at the front lines of a big multinational company with top-notch marketing and management theory. What results is an ideal primer for anyone seeking structured guidance on building a brand for a client, managing a brand, or even starting a brand for oneself. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Despite the fact that the majority of emigration today originates in the global south, most research has focused on the receiving states of Europe and North America, while very little attention has been paid to the policies of the sending states toward emigration or toward their nationals abroad. Taking the country cases of Morocco, Tunisia, Lebanon and Jordan, this work explores the relationship between the government of the sending states, the outmovement of their citizens and the communities of expatriates that have developed. By focusing on the evolution of government institutions charged with various aspects of expatriate affairs, this work breaks new ground in understanding the changing nature of the relationship between expatriates and their home state. Far from suggesting that the state is waning in importance, the conclusions indicate that this relationship provides evidence both of state resilience and of new trends in the practice of sovereignty.

How to Make Sewing Patterns solves the mysteries of pattern drafting with easy, step-by-step instructions and clear line drawings that show how to create custom-fit garments in a wide range of designs. The book s detailed instructions on measuring and fitting include do-it-yourself photographs as well as directions for creating custom dress forms. Don McCunn has certainly mastered pattern drafting and fitting a wide range of bodies. Whether or not you have taken pattern drafting in a class, this book is a good reference in a very readable style. I especially liked the exacting instructions on taking measurements on the body and the solution for side seams which are not perpendicular to the floor. --Sandra Betzina, the power behind power sewing. Author of 10 books, a syndicated column for 37 years, and a host of her own show on HGTV for 6 years. Beyond the impressive range of material in How to Make Sewing Patterns is the author's obvious concern that readers understand what they are doing and why. There are many helpful tips throughout the book, some quite clever and unexpected. The section on drafting a sloper contains excellent explanations of the various body contours, measuring, and fitting. Text, drawings, and photos of the human body from every angle illustrate the various interrelated contours and just how a pattern accommodates them. He even gives detailed instructions on how to measure and fit yourself. --Threads Magazine McCunn's book dispels the mysteries of pattern drafting, an area which was once the province of the couturier. A do-it-yourself text in which lessons build upon one another, this book provides detailed guides to creating patterns. --Library Journal The most readable pattern drafting book I've found. The drawings are the simplest line drawings possible but executed with concise purpose. --Whole Earth Catalog Donald McCunn leads the beginning seamstress or the advanced into pattern drafting via a thorough introduction. He shows that drafting is easy if each step is clearly related to the final outcome and if the drafter visualizes what he or she is doing. --Christian Science Monitor"
