how to do a valve adjustment on a mack ch613 e7 427?

I believe the E7's have timing marks on the flywheel but it takes two and I was often alone and use companion cylinder method. Write down the firing order. 1 5 3 6 2 4. Then under that write down 6 2 4 1 5 3. Rock the valves on 1 (exhaust closing and intake opening) and adjust the valves on 6, draw a line through 6. Then rock 5 and adjust 2, etc.

Valve adjustment procedure question | TruckersReport.com ...

Hey everyone my name is Donald I work at alescon Trinidad I'm having a problem with adjusting valves on a mack I've done it before using the flywheels marks on other mack engines 1&6 etc but I'm working on a 1994 e7 em7 mack engine and sadly the flywheel has no Mark's , took out the injectors and found tdc but someone told me you dont adjust direct at tdc can some one help me out

Valve adjustment on Mack engine.

Valve adjustment - YouTube

The valves are actually adjusted at 30 degrees after TDC. Unless this is an early E7 engine, you should have valve set markings on the flywheel. There should be a cover on the bottom of the flywheel housing held on with 6 small bolts. Remove the cover and you should be able to find the marks on the flywheel for adjusting the valves.
