Read Book Excavator 360 Lifting Operations Questions And Answers

□ Assistants or banksman are commonly used to assist in excavating and lifting operations. The hazardous area for any 360 excavator whilst working is within the operating radius over 360 degrees. □ The operator must ensure that all assistants and others must be clear of the working area and be in a safe place when work is being carried out.

CPCS RENEWAL TEST FACTSHEET Excavator 360

□ 360 excavators are commonly used to lift a suspended or slung load, for which certain precautions need to be taken. Before a load is to be lifted, the lifting operation needs to be properly planned and the operator or other relevant person needs to ensure that the machine is approved and equipped to lift a suspended load.
