What are the challenges that small countries face concerning innovation and what are the effects of globalization on their innovation systems? In this very interesting, rich and timely book, Edquist and Hommen compare ten different small national innovation systems from the Asia Pacific and Northern Europe that are rather advanced in their development. The answers that the authors give are convincing and relate not only to the unique characteristics of each national system that shapes innovative activity, but also to some commonalities that exist across these

countries. Franco Malerba, Bocconi University, Italy This major book presents case studies of ten small country national systems of innovation (NSIs) in Europe and Asia, namely, Denmark, Finland, Hong Kong, Ireland, the Netherlands, Norway, Singapore, South Korea, Sweden and Taiwan. These cases have been carefully selected as examples of success within the context of globalization and as new economies where competition is increasingly based on innovation. To facilitate comparative analysis the ten studies follow a common structure, informed by an activities-based approach to describing and analysing NSIs, which addresses the critical issues of globalization and the consequences of innovation for economic performance. The final chapter compares fast growth and slow growth countries, concentrating on issues of innovation policy. The results illustrate the usefulness of an activities-based approach to studying NSIs, point to distinctive national roles within an increasingly differentiated international division of labour and address the key themes of selectivity and coordination in innovation policy. This valuable book presents one of the most significant, comprehensive and comparative country studies of NSIs in the last decade. It will have great import and should be widely read by every serious student and scholar of innovation studies.

A new term, a new location for the Darke Academy - and everything is different for Cassie Bell. The beauty of the turquoise Kenyan sea can't make up for the loss of her soulmate, Ranjit. He's on the run, and Cassie will do anything to find him. But when the evil Katerina and her mother appear, more powerful than ever, Cassie has to make a crucial decision. And her love for Ranjit might just be her ultimate weakness ...

Shows communities how to take advantage of two tax credit programs for the preservation of buildings and the development of affordable housing. Part One, presents an excellent guide to effective combination of the historic rehabilitation and low-income housing credits. Part Two assembles six informative case studies that showcase successful cooperative efforts by nonprofit and for-profit groups to return blighted but beloved local landmarks into high-quality affordable housing. 33 photos.

The global trade in seahorses involves more than 20 million seahorses and 32 countries and territories each year. This report provides an overview of the trade, with an emphasis on China, Hong Kong, India, Indonesia, the Philippines, Taiwan, and Vietnam. It presents information on fishing methods, trade routes, volumes and values of the seahorses in trade, the key players and the issues of concern.

This book explores the connection between politics and mega-events in post-handover Hong Kong and Macao. It also offers an in-depth account of the two cities' keenness to integrate with China and engage in the international society and China's eagerness to build image, boost influence and gain respect on the global arena. This work will facilitate academics, think tanks, diplomats and government officials to further understand the politics and international relations of China, Hong Kong and Macao.

The Darke Academy is a school like no other. An élite establishment that moves to an exotic new city every term, its students are impossibly beautiful, sophisticated and rich. Death has followed the Darke Academy to the ancient city of Istanbul. An

unseen hunter is on the loose. Scholarship girl Cassie Bell is fascinated by the city's beauty, but there's no time for her to relax. Torn between an old flame and a new romance, she must also choose between the select world of the Few and her loyalty towards her best friends. And all the time a killer is stalking the Few. As Cassie is about to discover, no one is above suspicion. Sometimes, the people you love can be the most dangerous enemies of all ...

Financial services technology and its effect on the field of finance and banking has been of major importance within the last few years. The spread of these so-called disruptive technologies, including Blockchain, has radically changed financial markets and transformed the operation of the industry as a whole. This is the first multidisciplinary handbook of FinTech and Blockchain covering finance, economics, and legal aspects globally. With comprehensive coverage of the current landscape of financial technology alongside a forward-looking approach, the chapters are devoted to the spread of structured finance, ICT, distributed ledger technology (DLT), cybersecurity, data protection, artificial intelligence, and cryptocurrencies. Given an unprecedented 2020, the contributions also address the consequences of the current emergency, and the pandemic stroke, which is revolutionizing social and economic paradigms and heavily affecting Fintech, Blockchain, and the banking sector as well, and would be of particular interest to finance academics and researchers alongside banking and financial services professionals.

'Investor Protection and Corporate Governance' analyzes the impact of corporate governance on firm performance and valuation. Using unique datasets gathered at the firm-level the first such data in the region and results from a homogeneous corporate governance questionnaire, the book examines corporate governance characteristics, ownership structures, dividend policies, and performance measures. The book's analysis reveals the very high levels of ownership and voting rights concentrations and monolithic governance structures in the largest samples of Latin American companies up to now, and new data emphasize the importance of specific characteristics of the investor protection regimes in several Latin American countries. By and large, those firms with better governance measures across several dimensions are granted higher valuations and thus lower cost of capital. This title will be useful to researchers, policy makers, government officials, and other professionals involved in corporate governance, economic policy, and business finance, law, and management.

The Darke Academy is a school like no other. An élite establishment that moves to an exotic new city every term, its students are impossibly beautiful, sophisticated and rich. And the more new scholarship girl Cassie Bell learns about the Academy, the more curious she becomes. What sinister secrets are guarded by the Few - the select group of students who keep outsiders away? Who is the dark stranger prowling the corridors at night? And what really happened a year earlier, when the last scholarship girl died in mysterious circumstances? One thing Cassie will discover is that a little knowledge may be a dangerous thing, but knowing too much can be deadly...
