The connections between culture and sustainability have been in the public agenda since the 20th century. However, whilst global sustainability programmes at international institutional levels are yet to recognise the role of culture in their sustainability policies, the bid (albeit failed) in the early 2000s to formally add "culture" to the trilogy of sustainability pillars (economic, social, and environmental) mobilised a new discourse for the reframing of cultural policy narrative, which in turn urged a reassessment of methods of cultural management reflecting the same concerns among the sector's grassroots. The idea of sustainability and culture working together and their envisioned role in future-proofing society and human development captured the imagination of cultural commentators, policy makers and practitioners alike, keen to fulfil these principles "out there"—in cultural organizations and events mega and small, in cities and regions, local and global. The papers in this Special Issue reflect this appeal. This publication covers a wide selection of issues related to sustainable cultural management, which means that it can be recommended to a varied audience. First of all, it can be recommended to managers experienced in cultural management, where success is measured more by the degree of mission accomplishment and the social benefits achieved rather than by profit. Another group comprises the employees of cultural organizations who want to improve their knowledge of sustainable cultural management. This Special Issue can also be recommended to artists, researchers, students, state and local government employees, founders and patrons of art, and all those who want to understand the importance of sustainable cultural management.

Radicalization, Terrorism, and Conflict is a collection of scholarly works, authored by international researchers and leading thinkers, addressing contemporary, history-making issues in international security and terrorism from an interdisciplinary perspective. Contributors to this edited volume represent global perspectives, ideas, analysis, and research. Radicalization, Terrorism, and Conflict

transmits relevant findings, theory, and policy ideas for scholars of security and terrorism studies, for policy makers, and to the general public who are interested in keeping up with this global area of concern. It provides a jumping-off point for conversation and collaboration that can lead to new knowledge and broader understanding. As an interdisciplinary collection of manuscripts, this book integrates and synthesizes theory, research, and public policy analysis in an effort to solve the complex questions and problems presented by this topic. Recognition of the need to approach the problems of radicalization, terrorism, and interpersonal conflict from an interdisciplinary perspective is gaining strength within academic settings, policy institutes, and global conferences. Unlike most recent edited books on the subject that are on the market at this time, *Radicalization, Terrorism, and Conflict* provides an interdisciplinary approach to understanding related current issues. This approach encourages a broader perspective and thought process, trans-discipline and global collaboration and cooperation, and an integrated synthesis of knowledge. *Radicalization, Terrorism, and Conflict* opens with an analysis of the ongoing phenomenon of the Arab Spring. In Section 1, contributors look at how players in the theatres of local and international terror become radicalized. Section 2 analyzes how terrorism becomes manifest in the global theatre and how governments and their actors attempt to prevent it. Section 3 presents research to bring understanding to the actors' behavior and provide settings for future collaboration in understanding these phenomena.
