Además de la actualización y revisión de todo el libro, esta nueva edición introduce un capítulo independiente (el 22) sobre Espectrometría de masas y otro nuevo, el capítulo 29, sobre garantía de calidad. Los temas han sido introducidos e ilustrados con ejemplos concretos de interés y extraídos del mundo real. Una sucesión de recuadros a lo largo de cada capítulo amplían y explican puntos importantes que hay en el texto. Los ejemplos resueltos están pensados como una herramienta pedagógica importante para enseñar a resolver problemas. Las hojas de cálculo siguen teniendo gran importancia. En esta edición se introducen por primera vez algunas herramientas muy útiles de Microsoft Excel, como el trazado de gráficos, las funciones estadísticas, la resolución de ecuaciones.... Existe una página web (en inglés) www.whfreeman.com/qca que contiene prácticas, cuestiones, problemas adicionales con sus soluciones, temas complementarios, las imágenes del libro en formato PowerPoint....

The gold standard in analytical chemistry, Dan Harris' Quantitative Chemical Analysis provides a sound physical understanding of the principles of analytical chemistry and their applications in the disciplines.

Stable, higher income democracies often gave both a strong middle class and relatively low levels of inequality. Lower and middle income countries with highly unequal patterns of income distribution and stratified social structures often have a weak middle class, more social conflict and a tendency to populist and/or authoritarian politics. This publication investigates, for a sample of more than 120 countries, some empirical correlations between the size of a middle class and the following set of variables: the level (mean) of per capita income and wealth, the degree if inequality (Gini coefficients) of per capita income and wealth, the level and composition of public expenditure, the share of small and medium size enterprises in employment and output and an indicator of democracy.

This publication reviews the economy of Mexico, and is divided into four main sections: the behaviour of aggregate investment and its relationship to the growth process; trends and performance of foreign direct investment (FDI); the behaviour and determining factors of investment in manufacturing; and the impact of investment patterns on the manufacturing industry's structure and export performance.
