The Lotus Elan was Colin Chapman and Lotus' first affordable road car, produced from 1962 and, along with its larger Plus 2 variant, until 1974. As a replacement for the expensive Lotus Elite, the Elan and Plus 2 were both successful sports cars, which carried Lotus through the 1960s and into the 1970s. Starting with a brief history of Lotus and the Elan, Lotus Elan & Plus 2 Source Book provides a detailed originality guide to the Elan and Plus 2, identifying the design changes Lotus made to the models through their lifetimes. An 'owner's guide' provides detailed information on owning and maintaining the cars in tip-top condition, and gives details of common faults and upgrades. The restoration guide gives any potential restorer the information to carry out the tasks needed to bring one of the these cars back from the dead. With anecdotes and experiences from current and previous owners of Elans and Plus 2's, along with many colour photographs the book provides a valuable insight into owning running and racing these iconic cars.

THE DEFINITIVE DESCRIPTION OF HOW TO REBUILD AND RESTORE THE LOTUS ELAN, A LEGEND AMONGST CLASSIC CARS.

Nissan: Patrol Series GQ, 3.0 & 4.2 petrol & 4.2 diesel. Ford: Maverick Series DA. Petrol & diesel models. Does NOT cover UK Ford. Maverick. or Nissan Terrano.

The story of restoring an Elan +2 and Elan Sprint to concours edition. Advice on how to purchase a suitable car for restoration plus detailed practical information on preparing bodywork, trim, chassis, suspension, wheels, hydraulics, engine, electrics & wiring etc. 24 Chapters, plus appendices, give information on chassis changing, body restoration, including Elan +2 sills, rebuilding the Lotus/Ford Twin Cam engine, electrics including fitting a new loom, insight to tuning and running in, Elan developments, a remarkable Elan +2 Estate, rebirth of an accident damaged Sprint.

Offering simple methods of measuring AC and DC power lines, this highly popular, revised and expanded reference describes the selection of cores, capacitors, mechanical shapes, and styles for the timeliest design, construction, and testing of filters. It presents analyses of matrices of various filter types based on close approximations, observation, and trial and error. Supplying simple parameters and techniques for creating manufacturable, repeatable products, the second edition provides insights into the cause and elimination of common mode noise in lines and equipment, explores new data on spike, pulse, trapezoid, and quasisquare waves, and reviews the latest high-current filters.

Electric Vehicle Integration into Modern Power Networks provides coverage of the challenges and opportunities posed by the progressive integration of electric drive vehicles. Starting with a thorough overview of the current electric vehicle and battery state-of-the-art, this work describes dynamic software tools to assess the impacts resulting from the electric vehicles deployment on the steady state and dynamic operation of electricity grids, identifies strategies to mitigate them and the possibility to support simultaneously large-scale integration of renewable energy sources. New business models and control management architectures, as well as the communication infrastructure required to integrate electric vehicles as active demand are presented. Finally, regulatory issues of integrating electric vehicles into modern power systems are addressed. Inspired by two courses held under the EES-UETP umbrella in 2010 and 2011, this contributed volume consists of nine chapters written by leading researchers and professionals from the industry as well as academia.

The Elise saw the return of the genuinely exciting sports car. This was the first Lotus for a generation truly to revive Colin Chapman's ideals, proving a worthy successor to the seminal Lotus 7. The Elise was the first modern sports car to generate real enthusiasm, tempting many classic car fans to change their allegiance to this no-compromise contemporary classic. This fully updated second edition, published in the Haynes Enthusiasts' Guide Series, brings the story right up to date to include Toyota-powered and supercharged cars. Essential reading for all Elise owners and enthusiasts.

A young man in 1950s New Jersey discovers the twin loves of his life. One is open-road sports car racing, the other the boss' daughter. The hero is Buddy Palumbo, a mechanic in a gas station while the heroine is Miss Julie.

Here is the definitive history of one of Britain's oldest, most important and influential car manufacturers. George Singer started building bicycles in Coventry in 1874 and by 1905 his company was building cars and motorcycles too. Later the company would concentrate on the manufacture of cars and commercial vehicles, bringing great success in sales and motorsport until, in the early 1950s, things began to go wrong. By 1955 Singer was absorbed into the Rootes Group and slowly lost its distinctive identity. In 1970 the last car to carry a Singer badge was built - marking the end of the great Coventry marque and hammering another nail into the coffin of Britain's once great motor industry. Thoroughly researched and with over 300 photos this is an important piece of automotive history.

The International Federation of Library Associations and Institutions (IFLA) is the leading international body representing the interests of library and information services and their users. It is the global voice of the information profession. The series IFLA Publications deals with many of the means through which libraries, information centres, and information professionals worldwide can formulate their goals, exert their influence as a group, protect their interests, and find solutions to global problems.
