Anytone AT558 70MHz 4m Low Band VHF FM Transceiver | eBay

Portable ham radio transceivers are typically designed to be used in limited power situations but will usually have a lower performance than base stations model variants. For use in a vehicle, you can find mobile transceivers. These are typically high quality devices with FM voice utilising both VHF and UHF bands.

Ham & Amateur Radio Transceivers for sale | eBay

This transceiver covers VHF Low Band from 30 to 50 MHz in 2.5 KHz steps, VHF High Band from 138 to 174 MHz in 2.5 KHz increments and UHF from 403 to 512 MHz also in 2.5 KHz steps. Operating frequencies and other related data are presented on a 96 character, four line LED matrix display, which is available in either red or green.

Airborne UHF and VHF High/Low band FM Transceiver

The TFM-550, VHF High/VHF Low/UHF Band FM Transceiver is designed to provide secondary airborne communications to facilitate operations which are typically performed in a low altitude environment. The transmitter sections of this unit have a minimum of 8 watts and do not

TFM-66 from Technisonic is a single band VHF/FM transceiver designed to operate from 66.000 MHz to 88.000 MHz at the high end of the General Service VHF Low Band. Multi-Band Radios: TFM-500 is a dual band frequency agile airborne VHF and UHF FM transceiver. This transceiver operates from 138 to 174 MHz and from 403 to 512 MHz providing 12.5 kHz (narrow band) or 25 kHz (wide band)** channel spacing on both bands.

Analog Airborne FM – Technisonic Industries Ltd.

Kenwood TK-630H Low Band FM Transceiver. Condition is Used. Comes with everything you see in the photos. Working upon removal. Currently carries programming for Putnam County NY Fire/EMS 46.38 and similar range. You will have to program yourself, I do not have the ability to program it anymore. Comes with an Advanced Control head and Havis console mounts.

Kenwood TK-630H Low Band FM Transceiver | eBay

VHF is the first band at which wavelengths are small enough that efficient transmitting antennas are short enough to mount on vehicles and handheld devices, a quarter wave whip antenna at VHF frequencies is 25 cm to 2.5 meter (10 inches to 8 feet) long. So the VHF and UHF wavelengths are used for two-way radios in vehicles, aircraft, and handheld transceivers and walkie-talkies.
