Since the 1960's individuals and organisations throughout the world have been building geographic databases used in conjunction with geographic hardware and software systems to collect, analyse, display and archive digital data. Through

# Online Library Mio Digiwalker

the years it was recognised that efficiencies could be gained if the geographic database built by one group could be used by multiple users across different computer systems and formats. Therefore, it was acknowledged that spatial database transfer standards

# Online Library Mio Digiwalker Manual

were needed to facilitate the exchange and transfer of digital geographic data. Throughout the 1980's several organisations worldwide began working on the problem of producing spatial database transfer standards. As this work was
