A ferocious debut that puts Frank Bill's southern Indiana on the literary map next to Cormac McCarthy's eastern Tennessee and Daniel Woodrell's Missouri Ozarks Crimes in Southern Indiana is the most blistering, vivid, flat-out fearless debut to plow into American literature in recent years. Frank Bill delivers what is both a wake-up call and a gut punch. Welcome to heartland America circa right about now, when the union jobs and family farms that kept the white on the picket fences have given way to meth labs, backwoods gunrunners, and bare-knuckle brawling. Bill's people are pressed to the brink—and beyond. There is Scoot

McCutchen, whose beloved wife falls terminally ill, leaving him with nothing to live for—which doesn't quite explain why he brutally murders her and her doctor and flees, or why, after years of running, he decides to turn himself in. In the title story, a man who has devolved from breeding hounds for hunting to training them for dog-fighting crosses paths with a Salvadoran gangbanger tasked with taking over the rural drug trade, but who mostly wants to grow old in peace. As *Crimes in Southern Indiana* unfolds, we witness the unspeakable, yet are compelled to find sympathy for the depraved. Bill's southern Indiana is haunted with the deep, authentic sense of place that recalls the best of Southern fiction, but the interconnected stories bristle with the urban energy of a Chuck Palahniuk or a latter-day Nelson Algren and rush with the slam-bang plotting of pulp-noir crime writing à la Jim Thompson. Bill's prose is gritty yet literary, shocking, and impossible to put down. A dark evocation of the survivalist spirit of the working class, this is a brilliant debut by an important new voice.

legendary investor shows how to identify and master the cycles that govern the markets. We all know markets rise and fall, but when should you pull out, and when should you stay in? The answer is never black or white, but is best reached through a keen understanding of the reasons behind the rhythm of cycles. Confidence about where we are in a cycle comes when you learn the patterns of ups and downs that influence not just economics, markets, and companies, but also human psychology and the investing behaviors that result. If you study past cycles, understand their origins and remain alert for the next one, you will become keenly attuned to the investment environment as it changes. You'll be aware and prepared while others get blindsided by unexpected events or fall victim to emotions like fear and greed. By following Marks's insights—drawn in part from his iconic memos over the years to Oaktree's clients—you can master these recurring patterns to have the opportunity to improve your results.

Our faith should be an informed one because the God who created all things speaks to every sphere of life, and all facts should be studied in light of the revelation of God in Scripture. This is the foundation of Christian dominion. For R. J. Rushdoony, true government was the self-government of the Christian life in terms of God's law, so he wrote his position papers to better equip Christians to apply their faith to all of life. His objective was not to empower the state, or the organized church, but rather to call every person and institution to God's Word, which often put him at odds with both church and state. This three-volume collection of his position papers (1979-2000) are organized topically and are featured for the first time with an extensive index which will make this material far more accessible to the studious reader. This beautiful three-

volume collection of hardback books typically organizes ALL of Rushdoony's position papers (not only the 115 originally published in *Roots of Reconstruction*, but also 118 later essays, including six recently discovered unpublished papers).

Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant, pedestrian-friendly urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, *Walkable City* lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again.

Now in its second edition *Maritime Economics* provides a valuable introduction to the organisation and workings of the global shipping industry. With *The Energy Cure*, Dr. William Bengston presents astonishing evidence that challenges us to totally rethink what we believe about our ability to heal. Drawing on his scientific research, incredible results, and mind-bending questions, Bengston invites us to follow him along his 35-year investigation into the mystery of hands-on healing, and to discover a technique that may activate your healing abilities. Part memoir and part instruction, this provocative book explores: Bengston's paradigm-shifting experimental results and why they seem so difficult for some medical practitioners to accept Image cycling, a unique preparation method for a hands-on-healing treatment Why traditional Western medicine isn't always best, the value of skepticism, the strengths of energy medicine, and more William Bengston, PhD, is a professor of sociology at St. Joseph's College in New York. In his early twenties, he received hands-on healing that ended his chronic back pain. A self-proclaimed rationalist, he began a 35-year investigation that has made him one of today's leading researchers into the mystery and power of energy medicine.
