Expecting two or more? With humor, hope, and practical wisdom, Dr. Rachel Franklin helps you to better understand the unique circumstances of multiple pregnancy and birth. From the time you hear the news to the time you take home your bundles of joy, Expecting Twins, Triplets, and More will be an invaluable resource on what to expect, how to cope, and how to enjoy the journey. This reassuring reference includes information on: -Telling family, friends, and coworkers the news -Choosing a doctor -Exercising and eating well -Coping strategies trimester by trimester -Preparing for labor and delivery -Understanding potential complications and their solutions -Navigating the NICU (Neonatal Intensive Care Unit) -Celebrating the births and bringing home the babies Expecting Twins, Triplets, and More is like having a friend, who

also happens to be a doctor, share her experience and expertise to help you best take care of yourself and your babies at this very special time.

Safe Operation and Maintenance of Dry Dock Facilities is the first manual of practice to provide guidance for the operation of four main types of dry dock facilities: floating dry docks, graving docks, marine railways, and vertical lifts. Until now, some of these facilities have been operated and maintained without a thorough understanding of the design of their dry dock, and therefore the features that are vital to the safe operation of the facility. This manual is intended for commercial entities that operate one of the four dry docks discussed in this book. It will provide a cost-effective program for maintaining and operating a safe dry dock facility. This book examines in depth the four activities necessary to achieving this which include: condition assessment, maintenance, control inspection, and dock operations.

From his migration to America in 1774 to his death in New York City in 1809, Thomas Paine's ideology was at the centre of American political and social debate. This six-volume facsimile edition brings together rare texts from books, periodicals and newspaper contributions to unearth the contemporary American response to Thomas Paine.

This book is about the practical realities of the film market today and how to make a film while minimizing financial risk. Film is a risky investment and securing that investment is a huge challenge. The best way to get investors is to do everything possible to make the film without losing money. Featuring interviews with film industry veterans - sales agents, producers, distributors, directors, film investors, film authors and accountants - Daniel Harlow explores some of the biggest obstacles to making a commercially successful film and offers best practice advice on making a good film, that will also be a commercial success. The book explores key topics such as smart financing, casting to add value, understanding the film supply chain, the importance of genre, picking the right producer, negotiating pre-sales and much more. By learning how to break even, this book provides invaluable insight into the film industry that will help filmmakers build a real, continuing career. A vital resource for filmmakers serious about sustaining a career in the 21st century film industry.

An essential guide to ignition and timing, for classic car owners and restorers. Aimed at both keen amateurs and professionals alike, Ignition and Timing covers the history and evolution of the automotive ignition system, and how to fit, modify and maintain your system for optimum timing and maximum performance. Topics covered include understanding and fault-testing the coil ignition system; post-war distributors and aftermarket systems; how to fit electronic ignitions and modify the distributor, including twin-point distributors; rebuilding and maintenance; Lucas, Delco and Bosch systems; identification charts for your distributor and finally, how to achieve optimum timing and how to use a timing light. Fully illustrated with 90 colour images and 10 diagrams.

This handbook serves as a guide to deploying battery energy storage technologies, specifically for distributed energy resources and flexibility resources. Battery energy storage technology is the most promising, rapidly developed technology as it provides higher efficiency and ease of control. With energy transition through decarbonization and decentralization, energy storage plays a significant role to enhance grid efficiency by alleviating volatility from demand and supply. Energy storage also contributes to the grid integration of renewable energy and promotion of microgrid.

Once a pristine, natural paradise, CHIMA has become a battle ground for eight animal tribes. Best friends are now enemies. The animals fight for control of a natural resource called CHI, a powerful element that is both a source of life and potential destruction. Only a few brave heroes in CHIMA understand the true nature of CHI, and the possible downfall of CHIMA that will result from its misuse. Their stories, and the stories of those who seek to destroy them, are known as... THE LEGENDS OF CHIMA. The third volume in the hit series continues the adventures of Laval and his fellow members of the Lion tribe as they fight against Prince Cragger & the Crocodile tribe to preserve the balance of the mysterious force known as Chi.

This edition is not just a rehash of old, albeit classic and still important, stuff. Instead, it provides a fresh perspective on a topic of perennial interest for those working in the field that has been variously called training and development, human resource development, performance technology, and workplace learning and performance. The fresh perspective takes into consideration two additional instructor settings to the traditional face-to-face environments that most instructors and trainers know -- that is, online and blended settings. These settings are, of course, becoming more critical as instruction moves beyond classroom settings to include virtual and combinations of classroom and other media delivery methods. The ibstpi instructor competencies match up well to Mapping the Future (Bernthal, Colteryahn, Davis, Naughton, Rothwell, & Wellins 2004), the current ASTD competency study of the field now known as Workplace Learning and Performance (WLP) and previously known as Training and Development (T&D). WLP is more than a new name for an old subject and represents a fundamental paradigm shift in what it means to be a professional in the field formerly known as training. WLP is all about getting improved performance -- and therefore improved results -- in organizational settings through planned and unplanned learning interventions. Instruction is thus a means to an end and not an end in itself. The ibstpi instructor competencies dovetail well with that philosophy.
