The interconnectedness of the ear, nose, and throat is evident when you consider how the smell of garlic cloves on the grill or chocolate chip cookies in the oven can affect your perception of their taste, or how a runny nose and scratchy throat can lead to an ear infection. In addition to enabling sensory perception, the ear, nose, and throat perform a number of vital functions in the human body. This incisive volume examines the structure of each in turn and in concert with the other, also exploring the diseases and disorders that sometimes afflict them.
