Harry Alan Towers' reputation rests upon a corpus of 95 low-budget productions shot post-haste in every corner of the globe. He took an integral part, however, in the development of the protocols that now underpin much transnational film production and he must be regarded as a pioneer. Towers' slash and burn strategy focused on parasitic, back-to-back productions, funded by rights bundles that were pre-sold globally. This strategy was substantially derived from his early days in broadcasting wherein he acted as a go-between in the American and the British Commonwealth markets. Though he became adept at procuring funds from pariah regimes and black market economies, primarily he continued to act as a broker bringing together American equity investment and European finance under the auspices of EC co-production agreements. He was also quick to exploit the burgeoning niche markets becoming available in the wake of technological developments and government initiatives.

Featuring an introduction by Playboy founder, Hugh Hefner, a paperback edition of the magazine's best-selling retrospective, first published in 1993, contains its most memorable articles and more than a thousand photographs and illustrations. Reprint.

In *The Cold War from the Margins*, Theodora K. Dragostinova reappraises the global 1970s from the perspective of a small socialist state—Bulgaria—and its cultural engagements with the Balkans, the West, and the Third World. During this anxious decade, Bulgaria's communist leadership invested heavily in cultural diplomacy to bolster its legitimacy at home and promote its agendas abroad. Bulgarians traveled the world to open museum exhibitions, show films, perform music, and showcase the cultural heritage and future aspirations of their "ancient yet modern" country. As Dragostinova shows, these encounters transcended the Cold War's bloc mentality: Bulgaria's relations with Greece and Austria warmed, émigrés once considered enemies were embraced, and new cultural ties were forged with India, Mexico, and Nigeria. Pursuing contact with the West and solidarity with the Global South boosted Bulgaria's authoritarian regime by securing new allies and unifying its population. Complicating familiar narratives of both the 1970s and late socialism, *The Cold War from the Margins* places the history of socialism in an international context and recovers alternative models of global interconnectivity along East-South lines. Thanks to generous funding from The Ohio State University Libraries and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access volumes from Cornell Open ([cornellopen.org](http://cornellopen.org)) and other repositories.

From the bestselling author of *Nickel and Dimed*, an explanation of recent sexual culture and the loosening of marriage bonds in recent history. "Finally someone is offering a new, utterly plausible explanation...of loosening marriage bonds. According to Barbara Ehrenreich...it is men who started walking off, in search of freedom from their stifling role of breadwinner/success-machine. The shock—and exhilaration—of this book comes from the recognition that here is a woman who has dared to look beyond the everyday assumptions about love and commitment to examine which bonds between men and women can endure and which may last forever."—Vogue

Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, *Atlas Shrugged* is Ayn Rand's magnum opus: a philosophical revolution told in the form of an action thriller—nominated as one of America's best-loved novels by PBS's *The Great American Read*. Who is John Galt? When he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. *Atlas Shrugged*, a modern classic and Rand's most extensive statement of Objectivism—her groundbreaking philosophy—offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century's leading artists.

Napalm was invented on Valentine's Day 1942 at a secret Harvard war research laboratory. It created an inferno that killed over 87,500 people in Tokyo—more than died in the atomic explosions at Hiroshima or Nagasaki—and went on to incinerate 64 Japanese cities. The Bomb got the press, but napalm did the work. Robert Neer offers the first history.

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 192 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.
