price, and other economic variables to provide incentives for polluters to reduce or eliminate negative environmental externalities. MBIs seek to address the market failure of externalities by incorporating the external cost of production or consumption activities through taxes or charges on processes or products, or by creating property rights and facilitating the establishment of a proxy market f

~~Market-based environmental policy instruments—  
Wikipedia~~

Policy instruments for sustainable tourism Policy instruments for more sustainable tourism management are not different in essence from instruments in other fields of environmental public policy. They can be classified into economic (or market-based), regulatory (or command-and-control) and institutional instruments.

~~Policy instruments for sustainable tourism~~

It is unlikely other policy instruments, such as environmental taxes, would fare much better. The point is that when ' government failure ' is likely, the political economist should avoid comparing ' optimal ' trading schemes with ' optimal ' taxes, and instead examine ' realistic ' trading schemes (given the relevant set of interest groups and their incentives) and ' realistic ' taxes.
