I have the  
ResMed AirSense  
A10 AutoSet. I  
started out in  
Auto mode, and  
after I found  
out what  
pressure works  
best for me, I  
switched it to  
fixed pressure  
mode. My wife  
has a S9 and

still runs it in  
Auto mode. I  
think for people  
who have  
significant  
central apnea a  
fixed pressure  
may work better  
than an auto  
pressure  
machine.

Every morning I check the machine for the night's AHI and it's always been good: usually between 1.3 and 3.5 or so. Once or twice a month it'll hit 4+. Maybe 2 or 3 times a year it will go above 5. I think I hit 6
