Between 1984 and 2004, there are 206 landslide incidents involving water-carrying services in the immediate vicinity of the slopes of concern. Amongst the 206 landslide incidents, 44 were major (i.e. with a failure volume  $50 \text{ m}^3$ ). The temporal distribution of the relevant incidents is presented in Figure 1.

## REVIEW OF INCIDENTS INVOLVING SLOPES AFFECTED BY LEAKAGE ...

Previous research has reported a high rate of tractor rollover incidents in agriculture that are caused by a steep slope, and safety signs play a key role in warning users against these hazards. In this study, the comprehension of two different graphical representations of slope steepness, in degrees and percent values, was investigated, while also considering the possible effects of previous experience with machinery, history of incidents, and on-farm occupation.

## Warning against Critical Slopes in Agriculture ...

A review of these accidents, and a review of shaft and slope tasks and operations, reveal two important factors: (1) The hazards that confront these workers are generally no different from hazards faced by all other underground or surface miners; and (2) while we recognize that there are some specialized shaft and slope tasks, shaft and slope construction workers perform a number of tasks that are similar to, or the same as, tasks performed by miners already covered by part 48 training.

Review of recent incidents involving flammable mists  
review is therefore past incidents, most of them involving the plant and equipment in our industry. Once again, these incidents give us a great opportunity to learn from the past, and more importantly, to prevent the same things happening again. These types of incidents tend to be less common, unexpected and more serious when

## SHE MANAGERS REVIEW OF PAST ASSET RELATED INCIDENTS

(c) A breakdown of landslip incidents involving upgraded slopes in the past three years is at Annex 2. It can be seen that most landslips were minor ones, while the other four landslips involving a larger volume of debris did not cause serious consequences but only affected open spaces or non-major roads for a short time.

The accidents above all occurred outside of the U. S. Table 1 lists five industrial explosives transport accidents in the U.S. None of the U.S. accidents resulted in fatalities. (There was a fatal accident involving Division 1.3 fireworks but the authors have limited this discussion to explosives used in industrial applications.)

## A Review of Recent Accidents Involving Explosives Transport

Rockfall is a common process in Newfoundland and Labrador, due to the combination of relief, steep slopes resulting from glaciation, repetitive freeze-thaw conditions, and jointed, faulted and stratified rock-units with multiple planes of weakness. Most incidents involve single blocks, and those involving large volumes of debris are rare.

## Slope failure hazard in Canada's Atlantic Provinces: a review.

Unit Test - Slope and Linear Graphs. Multiple Choice (80 points, 5 points each) Identify the choice that best completes the statement or answers the question. 1. Find the slope of the line that passes through the points (2,7) and (2,- 6). A. 1 . B. 0 . C. undefined . D. -1 . 2. Find the slope of the line that passes through the points (4,10 ...

## Unit Test - Slope and Linear Graphs

lead you into the differences between positive and negative slopes, writing a slope in simplest form, and noting that any two points on the same line will give the same slope. Once this activity is done, you ' ll be ready
