There are about 80,000 words in the Quran but the actual words are only around 2000!!! This could also be termed as one of the many miracles of the Quran. Accordingly, if a reader decides to learn only 10 new words every day, he can understand the basic message of the

Quran within a period of seven months! So it is indeed very easy to understand the Quran, provided one is willing to learn it. This word-for-word translation may not be considered as an addition to the existing translations, but an attempt to equip the reader to understand the revelation directly from the Arabic text; thus it will Insha-Allah be a very useful tool for those who are willing to study the Quran and try to understand it. A beginner can bear in mind the meanings of each Arabic word provided right below it. Since many words are repeated in the Quran, the student will find for himself that within a few months of regular study, he is indeed able to understand the Quran through the text itself. It may also be pointed out that a beginner does not have to, in the start itself, be worried about learning extensive grammar or how to speak the Arabic language. In fact, one has to develop vocabulary before learning grammar for the following reasons: \* A child first learns words and then starts linking them together. We speak our mother tongue fluently without ever learning the grammatical rules. That is to say, we learn it by repeatedly listening to the words. \* Learning extensive grammar before improving vocabulary is like putting the cart before the horse. Or it is like learning different styles of swimming by moving hands in the air inside a swimming pool without water. One has to fill the swimming pool with water (i.e., increase vocabulary) and then learn to swim (i.e., to connect the words with grammatical rules).

The Devil King sallies forth on his trusty steed (bicycle) to save his captured fast-food colleague! But stripped of his magic, is there any way he can triumph over the powerful foe he faces? The full-time adventures of the part-time burger flipper continue!

This book pursues the implications for linking Lenin with theology, which is not a project that has been undertaken thus far. What does this inveterate atheist known for describing religion as 'spiritual booze' (a gloss on Marx's 'opium of the people') have to do with theology? This book reveals far more than might initially be expected, so much so that Lenin and the Russian Revolution cannot be understood without this complex engagement with theology. It also seeks to bring Lenin into recent debates over the intersections between theology and the Left, between the Bible and political thought. The key names involved in this debate are reasonably well-known, including Alain Badiou, Slavoj Žižek, Giorgio Agamben, Antonio Negri, Terry Eagleton, Ernst Bloch, Theodor Adorno, Louis Althusser, Gilles Deleuze and Félix Guattari. Boer has written concerning these critics, among others, in Boer's earlier five-volume Criticism of Heaven and Earth (Brill and Haymarket, 2007-13). Lenin and Theology builds upon this earlier project but it also stands alone as a substantial study in its own right. But it will be recognised as a contribution that follows a series that has, as critics have pointed out, played a major role in reviving and taking to a new level the debate over Marxism and religion. The book is based upon a careful, detailed and critical reading of the whole 45 volumes of his Collected Works in English translation – 55 volumes in the Russian original. From that close attention to the texts, a number of key themes have emerged: the ambivalence over freedom of choice in matters of religion; his love of the sayings and parables of Jesus in the Gospels; his own love of constructing new parables; the extended and complex engagements with Christian socialists and 'God-builders' among the Bolsheviks; the importance of Hegel for his reassessments of religion; the arresting suggestion that a revolution is a miracle, which redefines the meaning of miracle; and the veneration of Lenin after his death.
