which also has immediate effects in academic peripheries such as the Balkans, the Middle East, or South-East Asia, is of great influence for the pedagogical practice of "less profitable" academic areas such as the Humanities: philosophy, languages, sociology, anthropology, history. Because of the absence of a historically grounded establishment of the Humanities, academic peripheries, usually accompanied by a weak civil society infrastructure, seem to offer the most fertile ground for rethinking the Humanities, their pedagogical practice, and their politics, as well as the greatest threats, such as the ongoing capitalization of research, and profitability as the norm of educational achievement. The sprawling presence of for-profit universities and in academic peripheries such as Albania and Kosovo is indicative of this problematic, as are consistent underfunding of universities and the relentless budget cuts in American and English, and to a lesser extent European, universities. Motivations for this ongoing attack on the university are often driven by a political system or a politics with an aggressive stance to critical thought."

World-renowned restorative yoga teacher Jillian Pransky came to the practice of yoga to heal herself. For much of her life, she subscribed to a relentless work hard/play hard mentality, burying parts of herself beneath the pursuit of busy-ness and accomplishment. It wasn't until a devastating personal loss and health crisis thrust her into suffocating anxiety that she stopped racing around. As she began to pause and examine her actions and emotions, she found herself able to unlock deeply seated tension in her mind and body. Since then, Pransky has been devoted to studying and teaching mindfulness practices, deep relaxation, and compassionate listening. In Deep Listening, Pransky presents her signature Calm Body, Clear Mind, Open Heart program—a 10-step journey of self-exploration that she's taught around the world. Derived from the techniques that healed her, the practice of Deep Listening invites you to pay close attention to your body, mind, and heart. You're taught how to tune inward and relax into a state of openness, ease, and clarity. This is the new frontier in integrative wellness—mindfulness designed for healing. Pransky doesn't ask you to “be your best self,” or “do more!” She asks you to “be here” and “do less.” She guides you gently through the stages of Deep Listening, from being present and noticing your tension to welcoming what you discover with softness and compassion. She integrates tools like guided meditations, journaling prompts, and restorative yoga poses to help you regard yourself with kindness and curiosity. Immersing yourself in the practice of Deep Listening will allow you to nurture your own well-being.
