Understanding the Canadian Business Environment is the only ground-up Canadian text that emphasizes an analytical approach using case orientation to understanding the core material students need to be successful post-graduation. The text takes the reader on a journey that explores the environment within which business operates--both within the Canadian context and within the global context. The reader will be introduced to a variety of perspectives, theories, and concepts that shed light on real business issues.

The tourism market is fiercely competitive. No other market place has as many brands competing for attention, and yet only a handful of countries account for 75% of the world's visitor arrivals. The other 200 or so are left to fight for a share of the remaining 25%. Therefore, destination marketers at city, state and national levels have arguably, a far more challenging role than other services or

consumer goods marketers. Destination Marketing: an integrated marketing communication approach focuses on the five core tenets of integrated marketing communications. These embody both the opportunities and challenges facing Destination Marketing Organisations (DMOs), and are: 1. Profitable customer relationships; 2. Enhancing stakeholder relationships; 3. Cross-functional processes; 4. Stimulating purposeful dialogue with customers; and 5. Generating message synergy The author seeks to provide a rationale for DMOs; to develop a structure, roles and goals of DMOs; to examine the key challenges and constraints facing DMOs; to impart a destination branding process; to develop a philosophy of integrated marketing communications; to lead the emergence of visitor and stakeholder relationship management; and to set forth options for performance measurement.

This book provides an overview of the theory, practice and context of entrepreneurship and innovation at both the industry and firm level. It provides a foundation of ideas and understandings designed to shape the reader's thinking and behaviour to better appreciate the role of innovation and entrepreneurship in modern economies, and to recognise their own abilities in this regard. The book is aimed at students studying advanced levels of entrepreneurship, innovation and related fields as well as practitioners (for example, managers, business owners). As entrepreneurship and innovation are largely indivisible elements and cannot be adequately understood if studied separately, the book provides the reader with an overview of these elements and how they combine to create new value in the market. This edition is updated with recent international research, including research and examples from Europe, the US, and the Asia-Pacific region.
